The optimal functioning of the omega 3, vitamin K2, D and E, and other ingredients, are for use in packet form. When gelatin isn't mentioned it is generally gelatin made from pigs. What is the difference between the SALMON-OIL OMEGA 3 of

SUPER NATURE PRODUCTS and other salmon-oil omega 3 or fish-oil?

• The ratio salmon-oil is so unique and figured out that the maximum benefits are achieved.
• The salmon-oil is enriched with vitamin K2 as it scientifically confirmed that vitamin K2 promotes the general health of man. In particular, the beneficial effects are not only cardiovascular but also strengthens the bones. The daily balanced dosage gives optimal results.
• The salmon oil is enriched with vitamin D, which combats the persistency of the bones due to aging.
• The salmon oil is enriched with vitamin E, which is beneficial for the whole body as well for the skin, so it gives us a higher level of cholesterol and blood triglycerides. Eskimo's always had a diet rich in fatty fish and it is well known that the rate of heart disease in their population is very low or even zero. This means that they don't have clots in arteries which result in strokes, heart attacks and thromboses. Numerous scientific studies have revealed that certain fatty acids benefit the blood, reducing blood platelet stickiness and reducing risk of clots. What is the difference between the OYSTER-EXTRACT of

SUPER NATURE PRODUCTS and other oyster-salmon omega 3 or fish-oil?

• The quality and quantity of the active substances by the proper selection of raw materials from the endless choices available, influence further the strength of the product.
• Optimal functioning of the omega 3, vitamin K2, D and E, and other ingredients, are for use in packed form.

SNP OYSTER-EXTRACT

Ginseng root, also known as the root of life.

In China the ginseng root is well known for its strength and energy. That’s why the Ginseng root is a valuable addition to nature’s life. It has a large number of health benefits. The ‘root of life’ is known by the Korean for more than 5,000 years and is as valuable as gold. Only the family of kings were allowed to consume the root. To preserve the quality of the root costs time as the strength increases the longer the root grows! The root is known for being a tune for ginseng roots which are 6 years old. In this day and age the effect of ginseng is well known all over Europe. More than 155 constituents from the root have a beneficial influence to our health. SUPER NATURE PRODUCTS uses Panax AC-7 Ginseng containing ginsenosides and 155 other active ingredients, in the right amounts thus containing a natural body balance. Therefore enable an optimal “adapt gene effect” from the Ginseng. The ginsenosides, are believed to increase energy, and enhance intellectual and physical performance. When treated Ginseng gives you strength and in times of stress it calms you. The combination Panax-Ginseng and Royal Jelly by Super Nature Products is evenly balanced which makes the working synergistic, that means strengthened. Super Nature Products Panax-Ginseng andRoyal Jelly should be stored under 25 ºC, when opened store in refrigerator, after opening 5 weeks tenable.

The most valuable thing in life is good health.

Ginseng is a treasure of nature made by nurses or worker bees and is a gelatinous substance secreted from the ovarian glands. It is made for the sole purpose of stimulating the growth and development of the Queen bee. Without Royal Jelly the Queen bee would be no different from the worker bee and would live about as long (seven to eight weeks). With Royal Jelly, the Queen bee can live five to seven years. Royal Jelly is a complex nutrient comprised of proteins (13%), carbohydrates(14%), lipids, minerals and vitamins. Royal Jelly is a gelatinous nutrient which is collected by nurses from the queen bee, which is in particular. Known to be essential for energy production and important for healthy skin, hair and nails. Royal Jelly may assist in the maintenance or improvement of general well being. The combination Panax-Ginseng and Royal Jelly by Super Nature Products is evenly balanced which makes the working synergistic, that means strengthened. The extracts used in Super Nature Products Panax-Ginseng are made from Panax roots which are 6 years old. In this day and age the function of ginseng is well known all over Europe.

The salmon oil is enriched with vitamin D, which combats the porosity of the bones due to aging.

The ratio salmon/fish is so unique and figured out that the maximum benefits are achieved.

What is the difference between the SALMON-OIL OMEGA 3 of and other salmon-oil omega 3 or fish-oil?

The quality and quantity of the active substances by the proper selection of raw materials from the endless choices available, influence further the strength of the product.

The salmon-oil is enriched with vitamin D as it scientifically confirmed that vitamin K2 promotes the general health of man. In particular, the beneficial effects are not only cardiovascular but also strengthens the bones. The daily balanced dosage gives optimal results.

The salmon-oil is enriched with vitamin D, which combats the porosity of the bones due to aging.

The salmon-oil is enriched with vitamin E, which is beneficial for the whole body as well as for the skin, so it is good for your face.

The salmon-oil is enriched with DHA and EPA.

Are these not optional nutrients, yet most of the population is deficient in them. The consumption of salmon oil (lipids) provides the body with a direct source of the essential fatty acids which are required by the human body because our body cannot produce them.

The exposure of toxic materials increases every day, in the air as well as in our foods. The wrong fatty acids give us a high blood cholesterol level in fatty fish and it is well known that the rate of heart disease in their population is very low or even zero. This means that they eat a high amount of the right fatty acids.

What is the difference between the OYSTER-EXTRACT and other oyster extracts?

The amino acid taurin is very important for the human body. It is present in the brain, muscles, skeleton, lungs, heart, liver and almost all vital organs. Taurin is thus responsible for the correct functioning of the brain, the central area of all our thinking. A high level of taurin contributes to extra energy, resistance and concentration. Taurin fights fatigue because lactic acid (the consequence of muscular activity) is broken down by taurin.

The oyster is one of the richest sources of minerals, certainly concerning zinc. Zinc is a necessary element that can cause a lot of problems when insufficient. SUPER NATURE PRODUCTS OYSTER-EXTRACT contains a high level of zinc.

Zinc is very important in the production of the necessary enzymes and proteins. Taurin and zinc are crucial for a good memory. Together they reinforce each other's action and are very important for the recording and use of the data in our memory.

What is the difference between the OYSTER-EXTRACT of SUPER NATURE PRODUCTS and other oyster-extracts?

The salmon oil is the most valuable thing in life is good health.

Super Nature Products Panax-Ginseng and Royal Jelly should be stored under 25 ºC, when opened store in a refrigerator, after opening 5 weeks tenable.

Ginseng root, also known as the root of life.

In China the ginseng root is well known for its strength and energy. That's why the ginseng root is a valuable herb in nature has its chance to show. Noticeable and tremendous scientific studies have revealed that certain fatty acids benefit the blood, reducing blood plateled stiffness and reducing oxidation of cholesterol.

The ratio ginseng/royal jelly is so unique and figured out that the maximum benefits of both are achieved.

The extracts used in Super Nature Products Panax Ginseng are made from Panax ginseng roots which are 6 years old. In this day and age the function of ginseng is well known all over Europe. More than 155 constituents from the root have a beneficial influence to our health. SUPER NATURE PRODUCTS use PANAX (CA MEYER) Ginseng containing ginsenosides and 155 other active ingredients in the right amounts thus containing a natural body balance. Therefore enable an optimum "adapt gene" in the body, which helps the body to cope with stress and increase energy, and enhance mental and physical performance. When tired Ginseng gives you strength in times of stress. In the active ingredients of Panax Ginseng, they include the panaxins, which regulate glycaemic output, and certain polysaccharides (complex sugar molecules) which help to support immune function. With these actions Panax Ginseng can help the body cope with an active modern lifestyle.

What is the difference between the OYSTER-EXTRACT of SUPER NATURE PRODUCTS and other oyster-extracts?

• The oyster-extract in SUPER NATURE PRODUCTS OYSTER-EXTRACT has been treated by a special method so that one capsule corresponds to 125 fresh oysters. The oyster is one of the strongest animals of the world and can resist for 15 minutes a weight of 77 pounds (3.000 times its own bodyweight). Although the oyster has only a small muscle of 1,70 inch, it is able to keep its shell so firmly closed that many people have problems opening them. Oysters contain a large range of vitamins, amino acids, minerals and trace elements. The composition of its constituents is so perfectly balanced that its action is synergistic, i.e. mutually supporting. Oysters are rich in amino acids such as lysine, arginine, histidine, valine, isoleucine, leucine and others called taurin acids. These amino acids are not synthesized by the body. It is very important that the amino acids are provided via food. Taurin is known to be one of the most important amino acids and is necessary for the proper functioning of the pancreas, which produces the hormones that regulate the activity of the beta cells in the pancreas.

When gelatin isn’t mentioned it is generally gelatin made from pigs.

• The quantity and quality of the active substances by the proper selection of raw materials from the endless choices available, influence further the strength of the product.

• The optimal functioning of all existing active substances, are for use in packet form.

• The ratio salmon/oil is so unique and figured out that the maximum benefits are achieved.

• Due to the higher levels of taurin and zinc, gives people with a lack of energy a fitter and brighter feeling.

• The salmon-oil helps lower cholesterol and blood triglycerides. It is important to use salmon-oil. It is known that the rate of heart disease in their population is very low or even zero. This means that they eat a high amount of the right fatty acids.
